Problem of the Month The Wheel Shop Page 4 (c) Noyce Foundation 2007. To reproduce this document, permission must be granted by the Noyce Foundation: info@noycefdn.org. Level D: In the back stockroom at the Wheel Shop, the number of seats and horns equaled the number of wheels.

This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Provides a skill-building activity for each week Explores patterns, using graphs, geometry, and probability Includes explanations of problem-solving techniques, solutions, and transparency masters

The world in which we live is frenzied and furious, chaotic and confusing, daunting and discouraging. David Thatcher Wilson looks at all that is happening around us, and brings a collection of calming and consoling messages, based not in esoterica, but in common day-to-day life experiences.
