A Flight Information Manual for the Cessna 172, for use when learning to fly on the C172 or during type rating training, and a great reference manual for pilots who fly the aircraft. Compiled from engineering manuals, manufacturers handbooks, and the author's extensive flight experience. Provides straight forward, useful explanations of the aircraft, systems and flight operations including performance planning, with photographs, diagrams and schematics.

Presents information on flight operations in aircraft with the latest "glass cockpit" advanced avionics systems, covering such topics as automated flight control, area navigation, weather data systems, and primary flight display failures.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.
