Much has been written about the most famous American flyfisheries, but relatively little has been logged regarding the glorious brook-trout and landlocked-salmon water of northern New England. Thanks to long-time fishing guide Lou Zambello, we'll soon be enlightened. Covering Maine, New Hampshire, Vermont and western Massachusetts, Zambello relates years of flyfishing and guiding experience through observations, instructions and anecdotes. From ice-out through summer, fall and back to winter, all conditions and strategies are covered. You'll learn the best time to dead-drift a streamer versus twitching dry flies, and much more. He relates stories from such famous waters as the Kennebec, Penobscot, Grand Lake Stream, Rapid, Presumpscot, Androscoggin, and Deerfield Rivers, and Rangeley, Moosehead and Sebago Lakes, and many more throughout the region. Even if you're an experience northern New England angler, you'll find many useful morsels of information throughout this guide. And certainly if you're a rookie, you'll want this book.

Aimed at health care professionals, this book looks beyond traditional information systems and shows how hospitals and other health care providers can attain a competitive edge. Speaking practitioner to practitioner, the authors explain how they use information technology to manage their health care institutions and to support the delivery of clinical care. This second edition incorporates the far-reaching advances of the last few years, which have moved the field of health informatics from the realm of theory into that of practice. Major new themes, such as a national information infrastructure and community networks, guidelines for case management, and community education and resource centres are added, while such topics as clinical and blood banking have been thoroughly updated.
