This report addresses three concerns about the structure of trade in Latin American and Caribbean economies. The first is whether natural wealth and exports of natural resource-intensive commodities hampers economic development. The second concern is that natural resources create a concentrated export structure which exacerbates economic volatility and thus reduces growth. The third concern is that international trade might eliminate jobs. The wide-ranging report cites the experience of Australia, Canada, Finland, Sweden, and the United States, as well as some Latin American countries, to show how successful economies have been built on the basis of primary commodity exports.

Artificial materials have been widely studied and used in photonics and microwaves in the last few decades. Recent research has proven that the introduction of specific higher symmetries in each cell of a periodic medium is an effective approach to obtain unprecedented exotic behaviors and to overcome the current limitations of these devices. For example, simple symmetries of a purely spatial type (glide or twist transformations) can have a huge impact on the properties of the resulting materials, thus defining wideband behaviors for flat lenses or large stop bands for novel EBG materials. This Special Issue opens with a novel discussion on the effect of time-reversal symmetries in antenna theory and presents new structures exploiting symmetries for antenna and microwave components, such as flat lenses, helix antennas, and gap-waveguides. Finally, new modeling methods are discussed for the study of wave propagation along glide surfaces and twist lines.

Betsy, Tacy, and Tib are twelve—old enough to do lots of things...even go downtown on their own. There they see their first horseless carriage, discover the joys of the public library, and see a real play at the Opera House. They even find themselves acting in one! Best of all, they help a lonely new friend feel at home in Deep Valley—the most wonderful place in the world to grow up. Ever since their first publication in the 1940s, the Betsy-Tacy stories have been loved by each generation of young readers.

Renaissance Futurities considers the intersections between artistic rebirth, the new science, and European imperialism in the global early modern world. Charlene Villaseñor Black and Mari-Tere Álvarez take as inspiration the work of Renaissance genius Leonardo da Vinci (1452–1519), prolific artist and inventor, and other polymaths such as philosopher Giulio “Delminio” Camillo (1480–1544), physician and naturalist Francisco Hernández de Toledo (1514–1587), and writer Miguel de Cervantes (1547–1616). This concern with futurity is inspired by the Renaissance itself, a period defined by visions of the future, as well as by recent theorizing of temporality in Renaissance and Queer Studies. This transdisciplinary volume is at the cutting edge of the humanities, medical humanities, scientific discovery, and avant-garde artistic expression.

The subject of demons and demonology has fascinated scholars and non-scholars, ancient and modern alike; it is not surprising that much work has been done on the topic by biblical scholars too. Chapter 1 places the present study within the existing scholarship showing that the early works on 'OT demonology' were influenced by comparative religion, anthropology, and an increasing interest in Mesopotamian and Canaanite parallels as well as a concern to seek and find vestiges of ancient religious beliefs in the Old Testament. The consensus of early 20th century scholars regarding what constitutes a 'demon' in the Old Testament has not been challenged by modern scholarship. Chapter 2 shows that biblical scholars still commonly turn to the ancient Near Eastern religions and cultures to explain difficult passages in the Hebrew Bible, to find parallels or the 'original' of difficult terms and concepts. Since it is generally accepted without challenge that azazel, lilith, deber, qeteb and reshef are the personal names of 'demons' appearing in the Hebrew Bible, the necessity arises to return to the texts in order to examine each term in its context. The present study seeks to answer the question whether these five terms are names of 'demons' in the Hebrew texts as we have them today. To accomplish its goal the present study will provide an exegesis based on Close Reading of all the relevant biblical passages in which the terms azazel (chapter 3), lilith (chapter 4), deber (chapter 5), qeteb (chapter 6), and reshef (chapter 7) appear. Attention is paid to the linguistic, semantic, and structural levels of the texts. The emphasis is on a close examination of the immediate context in order to determine the function (and if possible the meaning) of each term. The reading focuses on determining how the various signals within the text can guide towards meaning, noting how the (implied) poet/author uses the various poetical/rhetorical devices, especially personification, but also parallelism, similes, irony, and mythological elements. The present study shows that contrary to former and current scholarship there is nothing in the texts to support the view that azazel, lilith, deber, qeteb and reshef are the names of 'demons'. Azazel appears as the personification of the forces of chaos that threaten the order of creation; his role is to stand in contrast to Yahweh. The context requires that lilith is regarded as a bird, a night bird being the most plausible explanation of the term. Deber, qeteb and reshef are personifications of destructive forces and appear as agents of Yahweh, members of his 'Angels of Evil' who bring punishment (death) on the people of Israel for disobedience. There is no evidence to suggest that there are mythological figures behind azazel, lilith or the personifications of deber and qeteb. In case of reshef there is a possible connection to the Semitic deity Reshef. However, the mythological motifs are used merely as a poetic device.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

From America's most beloved comedic actress and the star of Desperate Housewives comes a personal, heartfelt, and often very funny manifesto on life, love, and the lessons we all need to learn -- and unlearn -- on the road to happiness Teri Hatcher secured her place in America's heart when she stood up to accept her Golden Globe for Best Actress and declared herself a "has-been" on national television. That moment showcased her down-to-earth, self-deprecating style -- and her frank openness about the ups and downs she's experienced in life and work. But what the world might not have seen that night is that Teri's self-acceptance is the hard-won effort of a single mother with all the same struggles most women have to juggle -- life, love, bake sale cookies, and dying cats. Now, in the hope that her foibles and insights might inspire and motivate other women, Teri opens up about the little moments that have sustained her through good times and bad. From the everyday (like the importance of letting your daughter spill her macaroni so she knows it's okay to make mistakes) to the rare (a rendezvous with a humpback whale -- and no, he was not a suitor), the message at the heart of Burnt Toast -- that happiness and success are choices that we owe it to ourselves to make -- is sure to resonate with women everywhere.
