664. Magnetism. Magnetic
Suspension. This
experimental train can
travel at speeds as high as
500 km/h— without even
touching the track! It uses
magnetic levitation, or
maglev, to reach these high
speeds. Magnetic forces lift
the train above the track,
and propel it forward at
high speeds.

A balanced approach to science in each level. Glencoe Science: Level Red is the first book in Glencoe's three-book integrated science series. Level Red provides students with accurate and comprehensive coverage of life, earth, and physical science. The strong content coverage integrates a wide range of hands-on experiences, critical-thinking opportunities, and real-world applications.

Softbound Interactive Student Text is divided into a two-volume set that is perforated and 3-hole punched for easy organization for
