An update to this best-selling treatment program for domestic violence abusers. The bold interventions from STOP have now been field-tested for more than thirty years among military and civilian populations—and STOP has now treated more than 50,000 domestic violence offenders. David Wexler's program offers therapists, social workers, and other counselors a new level of sound, psychologically based interventions that reach the very men who often seem so unapproachable in a treatment setting. Treatment providers will find new sessions—based on the latest evidence-supported strategies—on insecure attachment issues, stages of change, groundbreaking results from the Adverse Childhood Experiences (ACE) study, normative male alexithymia, stake in conformity issues, substance abuse issues, and more. This new edition integrates twenty- four field- tested video clips to dramatically illustrate key issues for the group. Presented in a 26- or 52-week psychoeducational format, STOP is packed with updated skills, exercises, videos, handouts, and homework assignments that challenge men to examine themselves and develop new tools to manage their relationship issues.

Stop-motion puppet animation is one of the most unusual and demanding art forms in the world. It uses a variety of skills, including design, sculpting, metal work, mold making and casting, taxidermy, filmmaking, storytelling and acting, and can be seen in the simplest commercial spots on television to more complex animated shorts and science fiction and fantasy feature films. This work, with over 200 photographs and illustrations, demonstrates the construction of armatures for film industry stop-motion puppets and the technical aspects of how to machine metal into the desired shape. It describes in detail the milling machine and the metal lathe, the two main tools used in constructing the armature, other cutting tools, and how the anatomical makeup of the puppet determines the armature design. The book then examines the six main types of joints used in armature construction: the sandwich plate ball-and-socket joint, the ball-and-socket collet joint, the step-block ball-and-socket joint, the swivel joint, the hinge joint, and the universal joint. Also described are the different types of metals used in armature construction.
