The Dugopolski series in developmental mathematics has helped thousands of students succeed in their developmental math courses. Elementary & Intermediate Algebra, 4e is part of the latest offerings in the successful Dugopolski series in mathematics. In his books, students and faculty will find short, precise explanations of terms and concepts written in clear, understandable language that is mathematically accurate. Dugopolski also includes a double cross-referencing system between the examples and exercise sets, so no matter where the students start, they will see the connection between the two. Finally, the author finds it important to not only provide quality but also a wide variety and quantity of exercises and applications.

Intended for combined introductory and intermediate algebra courses, this text

"The text is suitable for a typical introductory algebra course, and was developed to be used flexibly. While the breadth of topics may go beyond what an instructor would cover, the modular approach and the richness of content ensures that the book meets the needs of a variety of programs."--Page 1.

Intermediate Algebra focuses on the principles, operations, and approaches involved in intermediate algebra. The book first elaborates on basic properties and definitions, first-degree equations and inequalities, and exponents and polynomials. Discussions focus on the greatest common factor and factoring by grouping, factoring trinomials, special factoring, equations with absolute value, inequalities involving absolute value, formulas, first-degree equations, graphing simple and compound inequalities, and

Read Book Intermediate Algebra 8th Edition Aufmann And Lockwood

properties of real numbers. The text then takes a look at rational expressions, rational exponents and roots, and quadratic equations. Topics include solving quadratic equations by factoring, discriminant and the sum and product of solutions, multiplication and division of complex numbers, combinations of radical expressions, rational exponents, complex fractions, and multiplication and division of rational expressions. The manuscript elaborates on sequence and series, logarithms, relations and functions, and conic sections, including ellipses and hyperbolas, nonlinear systems, function and notation, algebra with functions, common logarithms and computations, and word problems. The publication is a dependable reference for students and researchers interested in intermediate algebra.
