PDO Facial Threading Lift | Revenge MD | Cosmetology Services
PDO Threads are a cutting edge non-surgical face lift. As we get older, our collagen and elastin levels reduce. This can cause loose, saggy skin to the face and neck area, due to the loss of volume in the underlying components beneath the skin. As a result, jowls, lines, wrinkles and folds can develop, thereby leading us to look less contoured, youthful and fresh. PDO threads offer a non ...

Although threads are referred too many times as PDO, not all threads are made of PDO material. Threads can come in PDO, PLLA, and PCL materials. Then these materials can come in different formations: SMOOTH, SCREW, and BARBED or COGGED. Barbs and Cogs can vary on direction of the hooks and on how many sides of the thread have barbs or cogs for catching and lifting skin.

This book is a thorough guide on how to perform safe and effective thread-lifting procedures as a less invasive approach to rejuvenation of the face. The opening chapters explain the importance of the fixation technique, describe the facial and the pinch anatomy, and discuss the characteristics of absorbable threads. Clear descriptions are then offered of the basic technique employed for thread lifting, as well as techniques applicable for each thread type and techniques specific to each anatomic area. Understanding is aided by the inclusion of an abundance of illustrations depicting anatomy and technique. Potential complications and their management are systematically explained, and a new approach to outcome evaluation is also presented. The Art and Science of Thread Lifting will help plastic surgeons and dermatologists at all levels of experience to achieve the best possible outcomes in individual patients.

The book brings together and reinterprets all available information about the principles and methods of skin rejuvenation with PDO
